Re: Fee Schedule Changes

Staff has adjusted multiple fees to ensure that the permit fees account for staff hours required to complete the permit reviews and required inspections. A survey of surrounding cities was conducted to ensure new permit fees do not exceed regional charges. The remaining fees were within the current regional average, so no action was taken.

The following fees were increased:

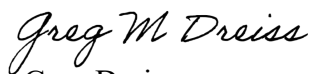

1. Preliminary Plan Reviews
2. Underground Fire Lines
3. Standpipe/water systems
4. Fire Sprinkler Systems

The following fees were added:

1. Subdivision site plan

Attached is a breakdown of both our current fees and proposed changes.

Staff is available should you have any questions regarding this matter.

Greg Dreiss
