

It's real.

MEMORANDUM

To: City of Seguin Mayor and Council
From: Andy Quittner, City Attorney *AQ*
Date: November 18, 2020
Re: Resolution approving Construction, Maintenance and Operation Agreement with TxDOT for IH-10 lighting

Requests have been made to TxDOT to improve safety and visibility by lighting IH-10 within the Seguin City limits.

TxDOT is willing to construct a continuous lighting system along IH-10 within the Seguin City limits on the condition that the City take over maintenance and operation of the system after construction.

TxDOT's construction of the City will be solely at their expense. The City will be responsible for operation – that is cost of electric power, and any maintenance. Maintenance should be low for quite some time. The lights will be LED lights thus electrical costs will be minimized.

For the portions of lighting in the area served by GVEC the City, by separate agreement, will pay for the operation costs.
