

## MEMORANDUM

January 13, 2016

To: Mayor and City Council Members

From: Douglas G. Faseler  
City Manager

Re: Agreement for Professional Engineering Services  
North Heideke (IH-10 access road to SH 123 Bypass) Street Reconstruction Project

---

Upon completion of the Heideke/Stremmel Sanitary Sewer Project, and in preparation for the planned Central States Manufacturing, Inc. facility, City Council has approved the reconstruction of this section of Heideke Street. This project will reestablish the roadway between 123 Bypass and IH-10 access road, and ensure that sufficient street infrastructure is available to assure adequate access to and from this new facility. Staff has requested a design proposal from TRC Solutions to ensure the timely design and subsequent construction of the necessary street improvements.

TRC Solutions has provided the attached proposal for design services, topographical surveying, geotechnical services, environmental services, and associated engineering for the reconstruction of approximately 1,750 linear feet on North Heideke Street. Also, included in the proposal is six easement exhibits that will be used in acquiring the necessary easements from adjacent property owners. Attached is TRC's proposal in the amount of \$74,060. Staff recommends accepting and approving the attached proposal for these services.

This project will be funded from the 2016 Certificates of Obligation.

C.c. Rick Cortes, Assistant City Manager  
Joe Ramos, P.E., City Engineer  
David Rabago, P.E., Utilities Engineer
