

PUBLIC WORKS

MEMORANDUM

To: Mayor Keil
City Council
Doug Faseler, City Manager

From: Jose (Joe) R. Ramos, Jr., P.E., City Engineer

Subject: Street Equipment

Date: June 14, 2016

As part of the Pavement Management Program recently approved by the City Council, staff finds it necessary to purchase street construction and maintenance equipment to increase the City of Seguin's in-house construction capabilities.

For the upcoming paving season, staff accessed the existing equipment inventory and compiled a list of equipment for acquisition. Staff is recommending the purchase of the following two equipment items:

1. Case Pad Foot SV208 Roller, \$83,102.72
This item will compact the material that the Asphalt Zipper pulverizes.
2. Rosco 1,000 Gallon Road Maintenance Trailer, \$75,319
This item is an asphalt distributor trailer.

The HGAC BuyBoard purchasing cooperative will be utilized to acquire both items, and funding will come from the 2016 Certificates of Obligations approved earlier this year. Staff recommends approval of both items to increase the City of Seguin's in-house construction capabilities during the upcoming paving season and beyond.
