

MEMORANDUM

To: Mayor and City Council Members
Steve Parker, City Manager

From: David Rabago, P.E., CFM, City Engineer

Through: Rick Cortes, Deputy City Manager

Subject: Engineering Services Eighth Street Extension and Drainage
Improvements

Date: July 1, 2021

Staff is requesting approval of a professional services agreement with Pape-Dawson Engineers, Inc. for engineering services for the Eighth Street Extension and Drainage Improvements Project in the amount of \$175,661.00. Pape-Dawson was selected through a Request for Qualifications process due to experience with similar projects.

The scope of work includes design of the extension of Eighth Street from its existing dead end to the Railroad right-of-way. A drainage conveyance system is also proposed, consisting of roadside ditches and a culvert crossing that will connect to existing downstream channel. Pape-Dawson will also provide grant administration coordination services for this EDA grant funded project.

Staff recommends approval and will be available to answer any questions at the July 6, 2021 City Council Meeting.
