

CITY OF SEGUIN

It's real.

To: City Council
From: Steven Purchase, Fleet Manager
Date: May 5, 2026
Subject: Authorizing the City Manager to approve the purchase of fleet management software

Historical Background

Fleet Services has utilized the Dossier Maintenance Software system since February 2016. This program significantly improved the department's ability to track maintenance costs by unit, schedule preventive maintenance activities, and monitor the condition of an aging fleet.

As the City's fleet has grown in both size and complexity, the limitations of the current system have become more apparent. To continue supporting efficient operations and informed decision-making, there is a need to transition to a more advanced maintenance management solution.

The proposed system will enhance the tracking of fleet maintenance and repair costs, provide improved inventory management capabilities, and offer better integration with the City's financial system. This upgrade is expected to strengthen overall fleet management and operational efficiency.

Action Requested

Approval to proceed with the purchase of the Faster Vehicle Maintenance Software in the amount of \$161,898.62. (initial setup & support). Then a yearly maintenance and support \$40,087.69.

Procurement Methodology & Funding Source

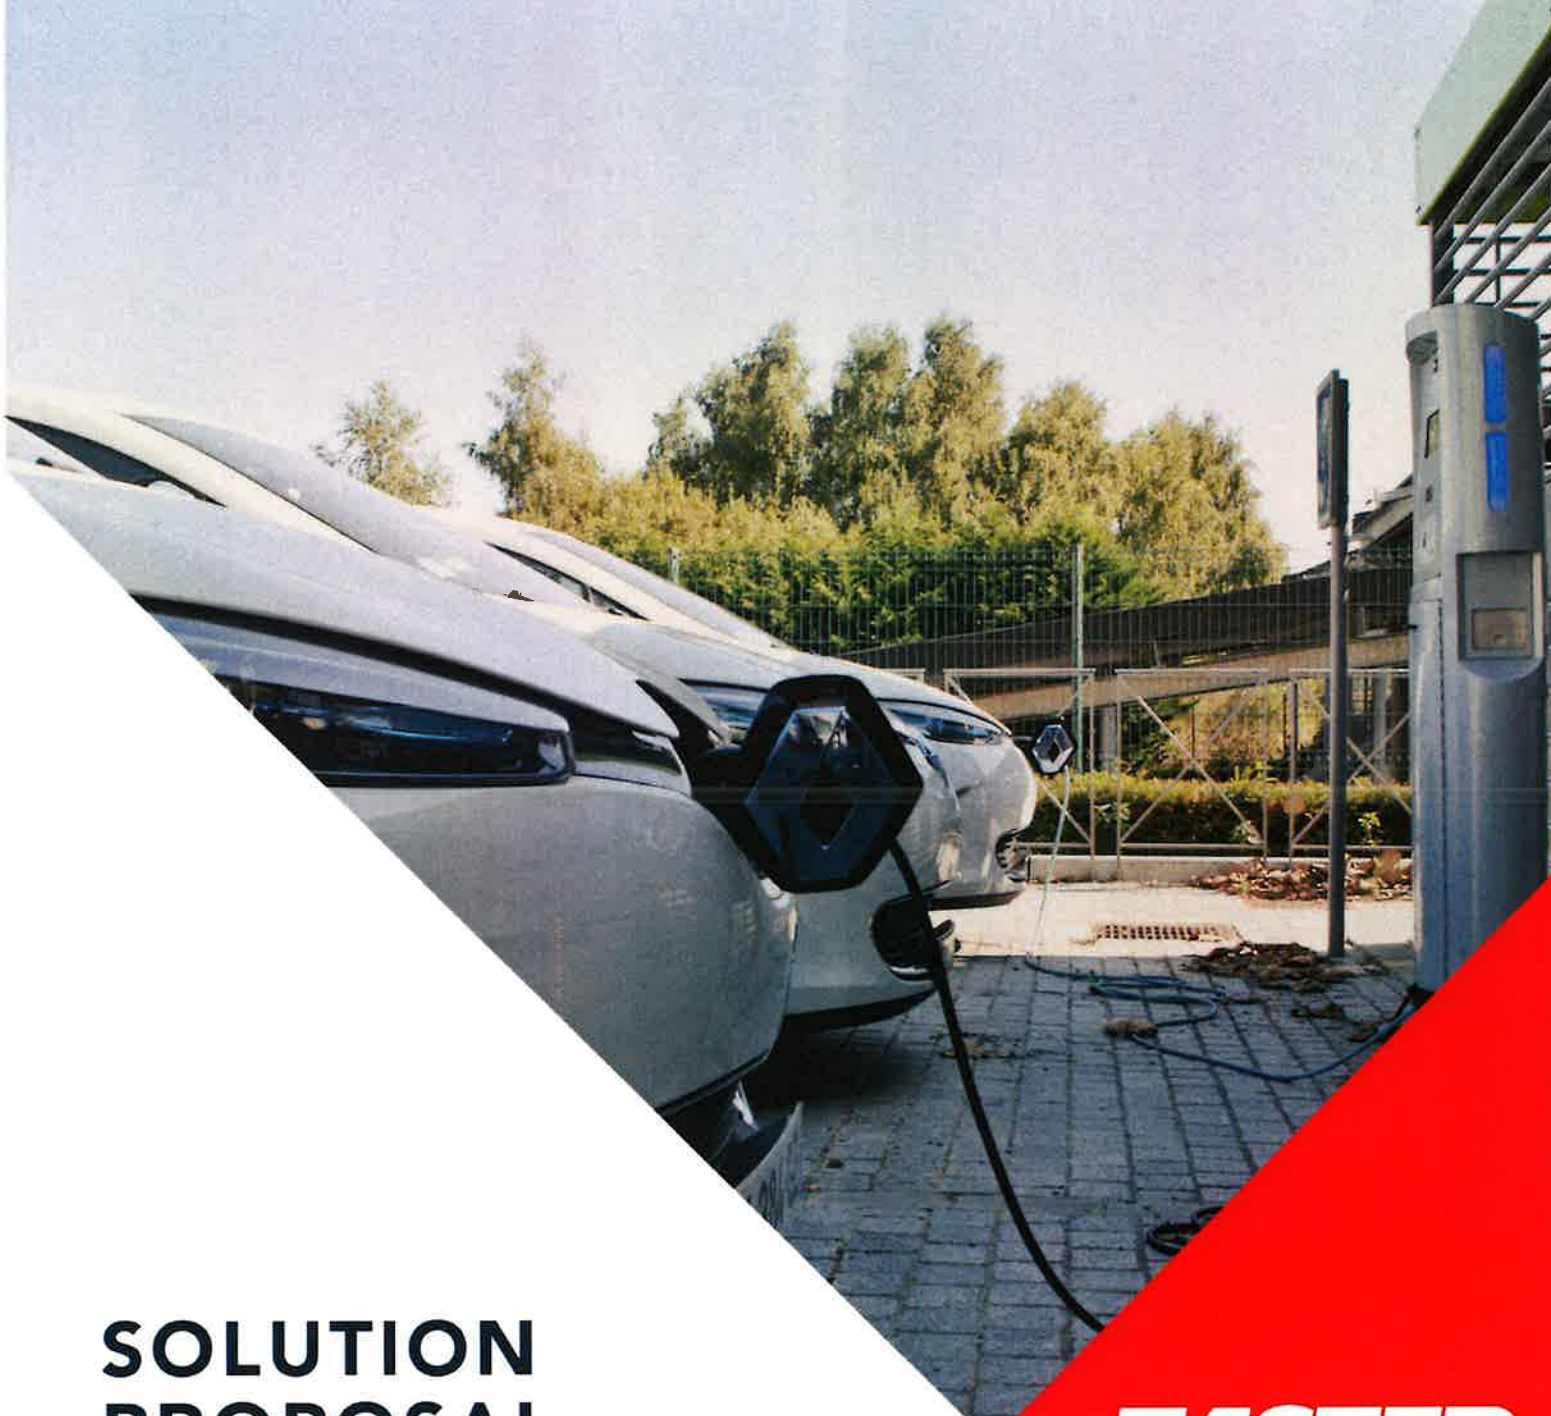

Vehicle Maintenance Software will be charged to VM26SOFTWARE36 036-9000-706100 \$60,993.00 AND VM26SOFTWARE38 038-9000-706100 \$100,993.00.

Staff Recommendation

Staff recommends the purchase of the Faster Fleet Maintenance Software

FASTER Asset Solutions Quote and Proposal

Steve Purchase

City of Seguin, TX

FASTER Asset Solutions is pleased to submit our proposal, City of Seguin CapEx Quote - NPP Contract# PS22100.

FASTER has been in business since 1982 and provides clients such as yourselves Fleet Management Information Solutions (FMIS). You have helped make FASTER the largest FMIS provider to city and municipal fleets in North America. Thank you!

We appreciate you considering a move to FASTER Web. Our robust cloud based FMIS.

FASTER is an Industry Leader for 3 key, strategic reasons:

FASTER has the Most Experienced Staff in the Industry:

Seventy percent of FASTER's technical staff have been with the company for more than 10 years. No other vendor fields the level of responsive, industry knowledgeable, technical support staff as FASTER. This provides more efficient implementations, superior 24/7-365 support, and ultimately better system utilization and ROI.

FASTER Invests in the Long-Term:

For more than 40 years FASTER has continuously improved FASTER solutions across three generations of technology. FASTER Web™ is latest, cloud-based Fleet Management Information Solution and includes the ability to integrate easily with other software through API technology. Additionally, FASTER issues multiple new updates each year that include new features and improvements across multiple aspects of the solution.

FASTER is Product and Service Focused:

Likely the most important distinction of FASTER is the strategy of continually reinvesting in FASTER products, solutions, and staff. This has created a justifiable reputation within the FASTER Client base, Strategic Partners and beyond that FASTER has industry leading software and the most responsive and knowledgeable support team in the asset management space.

Thank you for the opportunity to earn your business. If there is any additional information we can provide, or questions we can answer, please let us know.

Sincerely,

Transit Asset Management fka FASTER Asset Solutions

Category	Item	Qty	Price	Total
Addon Modules / API	Asset Birth Certificate Web Service API API for retrieving and updating Assets in <i>FASTER</i> Web.	1	\$6,190.00	\$6,190.00

API Method

Description

GET v1/Assets/BirthCertificates?status={status}

Returns a collection of Assets. If status is not set (empty string), the method will return all non-disposed and non-closed Assets by default. Status may be set to "ALL" to return every Asset record regardless of current Asset Status.

GET v1/Assets/BirthCertificates?date={date}

Returns a collection of Assets that are new or modified on or after the date submitted regardless of current asset status. If the date parameter does not include the time or time zone data, the API will set the time to midnight and/or use the server's time zone by default.

API Method	Description
POST v1/Assets/BirthCertificates/SearchByVinSerial?status={status}	Returns a collection of Assets with the VinSerial field that matches the VinSerial parameters submitted. If status is not set, the method will only return a matching Asset that is not Disposed or not Closed. The Status parameter may be set to "ALL" to return any matching Asset record regardless of asset status.
POST v1/Assets/BirthCertificates/SearchByLicense?status={status}	Returns a collection of Assets with the License field that matches the License parameters submitted. If status is not set, the method will only return a matching Asset that is not Disposed or not Closed. The Status parameter may be set to "ALL" to return any matching Asset record regardless of asset status.
POST v1/Assets/BirthCertificates/SearchByAssetNumberAndOrganization?status={status}	Returns a collection of Assets with the AssetNumber and Organization fields that match the AssetNumber or combination of AssetNumber and Organization parameters submitted. If status is not set, the method will only return a matching Asset that is not Disposed or not Closed. The Status parameter may be set to "ALL" to return any matching Asset record regardless of asset status.
PUT v1/Assets/BirthCertificates	Updates one or more existing Asset records. To update a record, only the VinSerial number and the fields being updated need to be present in the request. Null or blank fields will be ignored. To explicitly remove a value from a field that has been already set, submit the token "{clear}" as the value for the value in that field to be removed from the Asset record.

	API Method	Description			
	PUT vi/Assets/BirthCertificates/Update	Updates asset identification record, custom specifications and asset contacts. Optionally can re-assign asset to department and organization, and update asset status.			
	Faster Asset (Code: 320BCd)				
Professional Services / Development	Optional: FASTER Builds Middleware <i>Optional</i> 320n: Optional: FASTER Builds Middleware		1	\$6,015.00	\$6,015.00 \$4,210.50 Selected
	<p>FASTER can build the middleware for a flat-fee per API to connect your other vendor's APIs to FASTER Web's APIs. Alternatively, your IT or other vendor can build middleware if they desire, in this case, you will not need to pay FASTER for this. But if you desire FASTER to build the middleware, there is an added cost in addition to the API add-on cost.</p> <p>Please also be aware that FASTER can only provide this flat fee if the other vendor has clear and effective documentation and accurate and functional APIs. If after attempting to build middleware for you, FASTER finds the other vendor does not have clear and accurate documentation and or accurate and functional APIs, and or APIs which do not use methodology FASTER can access, FASTER reserves the right to refund this fee and cease work on building middleware or to discuss with you an added cost for middleware.</p> <p>30% Item Discount (\$1,804.50)</p>

 - One Time Fees: 30% at Purchase Confirmation/30% at Installation of Software/20% at System Overview/20% at Delivery of Converted Data, Go Live.
 - 100% of Annual Fees at Installation of *FASTER Web*. Any months remaining on *FASTER Win* support will be deducted from the first year's annual fee.
- Unless explicitly stated otherwise, all recurring support and maintenance fees are due beginning in year one of the agreement.

Legacy Data Preparation and Cleanup

FASTER Asset Solutions always recommends that customers confirm that all legacy system data is current, accurate, and in good order. Data maintained in good order from previous systems will not typically require any corrections and can be imported effectively and efficiently into the *FASTER Web* product without issue. In the event that there are legacy data issues that require correction by the customer, *FASTER Web* consultants will support those efforts for our customers by providing guidance and advice.
