Prolec GE Quotation Q-00010056 Rev0 & Rev1 – City of Seguin

Dear Mr Scott Mattke:

On May 31, 2022, Prolec GE quoted Wesco multiple single phase overhead pole-mount transformers for the City of Seguin, per the above referenced quotation Revision_0. However, one line item on the proposal, item #4 (50kVA 7200/12470–120/240V) should have been quoted as a single-phase pad-mount unit. When this error was brought to our attention, Prolec GE re-quoted Revision_1 to include the correct transformer which unfortunately resulted in a significant price increase for that specific item.

On behalf of the Prolec proposals team, I apologize for the quotation error and any inconvenience to Wesco or the City of Seguin. Please let me know if any additional questions regarding this proposal.

Yours sincerely,

Michael Smith
