Re: Guadalupe County Interlocal Agreement - Link Road

The Guadalupe County Road Department is planning on performing street maintenance on Link Road, in the County's jurisdiction. However, they have offered to perform the same rehabilitation work on the City's remainder of Link Road (approximately 5,132 feet plus an additional 568 feet to chip seal only) at their actual cost rate. See the attached photo indicating the City's section. The proposal is to reclaim and rejuvenate the street structure and apply two layers of chip seal. We have received a cost breakdown from the County Road and Bridge Staff in the amount of approximately \$72,762.34. We have previously received requests from the Navarro ISO to perform work on the section of Link Road in question. City Public Works staff and management have evaluated the cost and have determined that the cost is an excellent value.

Staff recommends approval of the attached agreement and resolution for the needed improvements.
