**Re:** 2018 Fire Code Adoption

---

Staff has reviewed the 2018 International Fire Code over the last several months. Currently the City of Seguin is following the 2015 International Fire Code. This code was adopted in January of 2016. It is important for the city to have a current fire code adopted to maintain a good Insurance Service Office rating.

Therefore, we are proposing to adopt the 2018 International Fire Code with the attached amendments.

It should also be noted that the Planning Department will be proposing to adopt the 2018 International Building Code. It is crucial that both the Fire and Building Code be on the same edition to prevent conflicts of the two codes.

I am available should you have any questions regarding this matter.

Thanks,

Greg M. Dreiss  
Battalion Chief – Fire Marshal
