Proposed FY2023-2031 Utilities CIP

Year	Utility	Project	Am	ount	Source
		Replace all Star meters and replace all Water MTUs - We have 5000 Star Electric			
		Meters and 5500 Water MTUs and finish the upgrade to the software. We are adding to this project to			
2023	Electric	cover adding area for water MTUs and adding DCUs to cover the new areas.	\$	300 000 00	Fund Balance
2023	Electric	Unamedo and valocata CC 00 Circuit from the Cubatation on Callege to Malaut	Ą	300,000.00	ruliu balalice
		Upgrade and relocate CS 80 Circuit from the Substation on College to Walnut. The Circuit is currently running along the creek and the poles have been falling over every year. We			
		will relocate underground along the transmission line that runs to Walnut. This will allow us to move			
	L	load to other circuits and balance out loads to switch and use as a backup in the event of a major	_		
2023	Electric	problems.	\$	355,000.00	Fund Balance
		Construct new lines on Kingsbury West to Hidalgo and North and South. This is			
2023	Electric	a tie circuit from East Sub to West Sub and needs to be upgraded because of all the load coming in.	\$	350.000.00	Fund Balance
		Circuit Ties Between Substations - This will provide engineering and	Ψ	330,000.00	T dire Balarice
		construction of ties between different substations to move load to different			
2023	Electric	areas of development.	\$	250 000 00	Fund Balance
2023	Licetiie	River Oak / Tor Drive / Pecan Orchard Lift Station - This project includes replacing the	<u> </u>	230,000.00	Taria Balarice
		existing River Oak Drive and Sutherland Springs Drive Lift Stations with a new 24-inch gravity main			
		along a new alignment to Pecan Orchard Lift Station. This project includes replacing the existing 12-			
		inch line upstream of the River Oak Drive Lift Station with a new 21-inch and 18-inch gravity line. This			
		project includes expansion of the Pecan Orchard Lift Station to a firm capacity of 7.2 MGD and			
		replacing the existing 12-inch Pecan Orchard force main with a new 18-inch force main along a new			
		alignment to connect to the ongoing parallel Walnut Branch Transfer Force Main. Once the new gravity mains are in service, the existing River Oak Drive and Sutherland Springs Drive Lift Station may			
		be decommissioned. This project includes a new 1.2 MGD lift station with an 8-inch force main along			
		Tor Drive to serve the Tor Drive Developments. The 8-inch force main will connect to a new 12-inch			
		gravity line to convey flow to the Pecan Orchard Lift Station. This project includes 8-inch gravity lines			
		to serve the proposed Tor Drive Developments. Once the appropriate gravity connection has been			
		established within the Pecan Ranch development, the existing Nagel Street Lift Station may be decommissioned. This project provides enhanced Lift Station service to developments within the			
		River Oak Drive and Sutherland Springs Drive service areas. Planned developments in the area include			
		Flying D Ranch, Park House, Neumann Tract, Willmann Tract, Rio Verde, and multiple Commercial			
		tracts. This project provides Lift Station service to the Tor Drive developments including Pecan Orchard			
		Tract, Pecan Ranch, Jetstream RV, and multiple commercial tracts. Engineering (\$5,000,000)			
		Construction (\$32,000,000)			
2023	Wastewater		\$	37,000,000.00	Bonds
		Love's Force Main Relocation (Final Engineering + Land Acquisition /			
		Construction) - TxDOT expansion of the IH-10 (US90A to FM464) CSJ#0535-01-077 project			
		identified the need to relocation the City's force main from the Guadalupe River bridge. Federal law			
		and Texas State statutes require TxDOT to reimburse a utility for any cost associated with the			
2023	Wastewater	relocation of assets along federal interstate highway rights-of-way.	\$	3,250,000.00	Bonds
		Wastewater Asset Management - Continuous strategic assessment of W/WW utilities			
2023	Wastewater	for assessing capital project and future utility planning.	\$	•	Fund Balance
2023	Wastewater	Repairs to existing wastewater infrastructure	\$	<u> </u>	Fund Balance
2023	Wastewater	Lift Station Upgrades and Compliance	\$	100,000.00	Fund Balance
		Surface Water / Ground Water Loop (Final Engineering + Land Acquisition) -			
		Preliminary engineering began in FY22. This project connects the two distribution systems to provide			
2023	Water	redundancy to the City's surface water customers.	\$	2,000,000.00	Ronds
	Trate.	Surface Water / Ground Water Loop (Construction) - Project connects the two	Υ	2,000,000.00	Donas
		distribution systems to provide redundancy to the City's surface water customers.			
2023	Water	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	\$	10,000,000.00	Bonds
		24" inch Transmission Main Vetter Booster to HWY 123 EST (Final Engineering,			
		Permanent / Construction Easements, Permitting UPRR, Land Acquisition) - Preliminary engineering			
		began in FY22. Provides a dedicated water transmission main from Vetter Booster towards 123			
2023	Water	elevated storage tank to manage system pressures.	\$	1,120,962.00	Bonds
		24" inch Transmission Main Vetter Booster to HWY 123 EST (Construction,			
		Contingencies 20%, Inflation 2yrs @5%/yr.) Provides a dedicated water transmission main from Vetter

2023	Water Water	transmission main from King St. to SH123. The project also includes replacing the existing 12" along SH1223 with a new 24" main from Cedar St. to Vetter Booster Station. Lastly, this project also includes connecting the existing 16" main at SH123 and US-90 to the Vetter Booster Station from the east. This project is triggered by increased demand in the upper pressure plan and provides additional system capacity to the Vetter Booster Station and increases residual pressure in the area. Engineering (\$2,000,000) Construction (\$6,500,000) SHWSC CCN TRANSFER Project S1 - Strempel Road Transmission Main Extension - This project constructs a 24" water main behind the SH-123 EST, replacing the existing 8" line down Austin Street to connect to the existing 12" line at Strempel Rd. This project also includes a new 16" water line along Strempel Road to Huber Road. (Engineering / Land Acquisition - \$1,000,000, Construction / Contingency - \$4,500,000) Huber Rd. Transmission Main Project S2 - This project includes a new 16" water line along Huber Rd. from Rudeloff Rd. to connect to the existing 16" water line at Cordova Rd. (Engineering / Land Acquisition - \$500,000, Construction / Contingency - \$2,500,000) Huber Rd. Water Line Expansion Project S4 - This project replaces an existing 4" water line along Huber Rd. with a new 8" water line from Cordova Rd. to Field Rd. (Engineering / Land Acquisition - \$350,000, Construction / Contingency - \$1,650,000) SH46 Water Line Expansion Project S3 - This project replaces an existing 6" water line along SH46 with a new 12" line from Cordova Rd. to the private drive on the north side of the Mill Creek Crossing neighborhood. This project also includes replacing the existing 4" water line along	\$	8,500,000.00 5,500,000.00 3,000,000.00	Bonds Bonds Bonds

2023	Water	High Service Pump Station Expansion - This project includes retrofitting the existing High Service Pump Station for the permanent installment of both roundhouse pumps. The existing roundhouse pumps include rated 2,500 and 1,500 gpm pumps that have historically been utilized as needed in a temporary fashion. This project converts these existing pumps to permanent operation to increase the High Service Pump Station firm capacity to 14.5 MGD. This project is intended to increase firm capacity of the High Service Pump Station in order to comply with TCEQ requirements for projected growth. (Engineering Only - \$250,000, Construction - \$1,250,000) Western Booster Station - This project involves the construction of a new pump station, 0.5 MG GST, and associated appurtenances to service the UPP. The pump station is recommended for two 1,000 gpm pumps for a firm capacity of 1.4 MGD and a total capacity of 2.8 MGD. This project also includes new 12-inch, 16-inch, and 20-inch lines. The 12-inch line will follow the railroad from the pump station and connect to the existing 12-inch line at Austin St. The proposed 16-inch line will follow I-10 from the pump station and connect to the proposed 16-inch at 8th St. The proposed 20-inch line will connect the pump station to the existing 16-inch line on Flemming Dr. This project provides redundancy and increased capacity to the Upper Pressure Plane and is triggered by TCEQ storage requirements by the 2040 planning period. 		24" SH-46 Western Transmission Main - This project involves construction of a new 24-			
		inch transmission line along SH-46, from the Starcke Water Treatment Plant to a new western booster			
		station. This project is primarily intended to serve as a surface water transmission line to increase the			
		available surface water capacity from the Surface Water Pump Station to the western booster station.			
		This line should also be constructed to connect to the High Service Pump Station at the water plant to provide dedicated ground water transmission, or combined systems transmission as needed. This			
		project should be constructed prior to transitioning wholesale delivery to the proposed site in the LPP.			
		This project is triggered by the proposed increase in wholesale demand to 3,000 ac-ft./yr. per the current wholesale contract. The existing surface water transmission line has adequate capacity for the			
		surface water customers but cannot convey the contracted wholesale demand. This project is			
		triggered by wholesale demand in excess of 2,500 ac-ft. per year at the existing wholesale delivery	_

Water Bonds Total Wastewater Bonds Total Total Bonds Water / Wastewater / Electric Fund Balance Total 2027 TOTAL Caterpillar Lift Station and Gravity Main - Inis project increases firm capacity of the lift station from 575 gpm to 700 gpm by replacing the existing pumps. This project replaces the existing 10-inch gravity main along C H Matthies Jr with a new 18-inch line from I-10 to Walnut Creek. This project includes	\$ \$ \$ \$	16,500,000.00 199,500.00 250,000.00 18,000,000.00 11,925,000.00 29,925,000.00 1,299,500.00	Bonds Fund Balance
2027	Water	customers in the event of an emergency. Engineering Only - \$1,500,000 24" SH-46 Western Transmission Main - This project involves construction of a new 24- inch transmission line along SH-46, from the Starcke Water Treatment Plant to a new western booster station. This project is primarily intended to serve as a surface water transmission line to increase the available surface water capacity from the Surface Water Pump Station to the western booster station. This line should also be constructed to connect to the High Service Pump Station at the water plant to provide dedicated ground water transmission, or combined systems transmission as needed. This project should be constructed prior to transitioning wholesale delivery to the proposed site in the LPP. This project is triggered by the proposed increase in wholesale demand to 3,000 ac-ft./yr. per the current wholesale contract. The existing surface water transmission line has adequate capacity for the surface water customers but cannot convey the contracted wholesale demand. This project is triggered by wholesale demand in excess of 2,500 ac-ft. per year at the existing wholesale delivery site. Construction - \$16,500,000 Storage tanks (Painting / Maintenance) Service - Service / Maintenance for 9 potable water storage facilities. Repairs to existing water infrastructure - In-house/contractor repairs / replacement of water distribution system. 2028	Water	1.5mg EST - This project includes construction a new 1.5 MG EST and pertinent piping. The new EST will be interconnected with the ground water system and surface water systems. This EST is proposed with an overflow elevation of 740- feet at a facility height of approximately 200-feet. The proposed elevation provides minimum residual pressures of approximately 60 psi to all surface water customers. The EST will float independently from the ground water system but may be filled via the UPP during emergency once pertinent projects have been completed. The primary driver for this project is to increase reliability for the surface water system and provide redundancy for surface water customers in the event of an emergency. Construction -\$10,000,000	\$	10,000,000.00	Bonds
2028	Water	West Booster Station Expansion Project S8 - This project includes a new 1000 gpm pump in the available pump slot. This expansion will increase the firm capacity. This project also includes a new 0.5 MG GST for a total GS of 1.0 MG. (Engineering Only - \$1,750,000)			Fund Balance
