Re: Meadowlake Dam Water Control Improvement District

The City of Seguin has been working with the Meadowlake Neighborhood Dam Association (MLNDA) and their newly created Water Control Improvement District along with the Guadalupe Blanco River Authority (GBRA) in hopes of finding a financially feasible resolution for the necessary repairs of Meadowlake Dam. As you are aware, the City of Seguin has hired the consulting firm of Freese and Nichols to conduct a feasibility study that would look at repair and replacement options for the dam. That study is currently underway and near completion. There is one last phase to the study that the City is proposing that we would like to discuss with you at the May 16th City Council meeting.
