Christopher Garcia

Biography

As the art director for *art & kustom kreations*® Christopher Garcia is passionate about instilling creativity in his students and promoting the studio's vision to inspire, create, and love. Born and raised in Houston, TX, his artistic process began as a young child. He later expanded his skill set when he was accepted into the Houston School for Performing and Visual Arts (HSPVA), a high school dedicated to the arts. Garcia continues his passion for art and learning as a student at the University of Houston Clear Lake earning his BFA.

A Houston contemporary artist, he typically works in latex and acrylic media. Vibrant colors, contrasting shapes, and bold compositions characterize Garcia's paintings. His primary source of subject matter inspiration comes from the city of Houston and Garcia's personal experiences within the city, which has suitably seeped into the mural projects he has completed in several area schools and businesses. His works have been displayed in several area locations as well as juried shows, including the Pearland Chamber of Commerce. Aside from regular large-scale mural projects, Garcia was awarded participation in the Pearland Convention Visitor Bureau community endeavor to complete a large pear statue for the Pearland PearScape project. The sponsor was Pearland Medical Center. A recent privately commissioned mural project located in Pearland was designed and implemented by Garcia and located at 3532 E. Broadway, Pearland, TX 77581. Other recent and current Houston area projects include Global Graduate murals for several schools on Houston's East End. Garcia is the studio director at an art studio and boutique gallery, *art & kustom kreations*®, located in Pearland, TX. He resides in Houston, TX with his wife and children.

Artist Statement

My artwork reflects upon my life and current surroundings. I use detailed imagery to define a series of events or current train of thought. The city in which I live, Houston, TX, has a big influence on my work. Social gatherings within and architectural cityscape structures has been a focal point for several series of paintings. I am currently exploring the aquatic life. For the past four years, I've been collecting fish from all parts of the world and I've been infatuated with their characteristic behavior and way of life. Starting a series from traditional painting, I ended up getting a bit more expressive with technique and style. I gave this new approach by applying contrasting bright colors and bold design elements with loosely stylistic brushstrokes into my new series. Now, I'm expanding this thought and am currently transitioning to a monster fish city take over. I work exclusively with latex mediums and also work on large-scale mural projects both in and outdoors.
