Re: Sales Tax on Residential Electric and Gas Sales

Attached is my memo regarding this sales tax that was provided to City Council in June 2018. City Council approved the proposed ordinance on first reading. When the item went before City Council for second reading it was tabled until budget discussions. It was not discussed during the budget process and no further action was taken. Since more than a year has passed, and there are three new Council Members seated on Council, it is the City Attorney's opinion that both a first and second reading is required on this ordinance if it is to move forward.

Please let me know if you have any questions.
