

MEMORANDUM

To: Mayor and City Council Members

From: Steve Parker
City Manager

Subject: Meadowlake Dam Study

Date: November 12, 2021

The City has been working with the Guadalupe Blanco River Authority (GBRA) and the Meadowlake Dam Neighborhood Association (MLNDA) to discuss ways that the two entities could work together on a possible solution to replace the gates of Meadowlake Dam. We are proud to say that GBRA has agreed to allow the association and the City to conduct an independent study with Freese and Nichols that would explore possible solutions and the anticipated cost of those solutions. Meadowlake has been doing extensive fund raising and have enough funds to cover the entire cost of the study. The City will merely act as the intermediary of the study and as a pass-thru for the funding of the study. This is a great first step into finding a possible solution to save the Meadowlake Dam. I wanted to say that I greatly appreciate GBRA and MLDNA in working together on this initiative.
